

Auditing of Financial Statement Reports

Your financial statement engagement will be performed by highly experienced CPAs who will manage your engagement, planning the work and coordinating the efforts of your staff and ours. We have invested in the latest technology and training in order to bring you the most efficient, effective financial statement engagement possible. We have also invested in the resources for benchmarking your data against that of your peers and in industry. This information is related to current and future trends to put your financial statement information in context.

We provide the following assurance services related to your financial statements:

Audits

The objective of an audit is to provide a reasonable basis for the expression of an opinion regarding your financial statements taken as a whole.

An audit represents the highest level of assurance and includes an assessment of the risks that your business faces and the impact of those risks on your financial statements, an understanding of your controls, an assessment of control risk, testing your accounting records and obtaining documentation for the assertions made in your financial statements.

Review

The objective of a review is to provide a reasonable basis for the expression of limited assurance that there are no material modifications necessary for your financial statements to conform to Generally Accepted Accounting Principles. A review consists of making inquiries of management and performing analytical procedures on financial data.

Compilation

A compilation consists of presenting in the form of financial statements information that is the representation of management. No assurance is given as to whether the financial statements conform to Generally Accepted Accounting Principles.
