

Business Technology Consulting

Your company will benefit from our Business Technology Consulting services by partnering with our team to help you plan, execute and measure your profitable growth. Our business software team listens to your needs, recommends, installs, implements and supports business software solutions that help you run your business: sales, purchasing, inventory management, production planning, accounting, payroll and human resources.

We implement, train, and support companies using world-class ERP systems and CRM applications from Sage Software designed for small and medium sized businesses.

ERP Software Solutions

Our team of professionals help small to medium sized businesses in Wisconsin, Michigan and Illinois get the most out of their ERP business software. We partner with Sage Inc., Synergistic Software, and other independent software vendors to offer world-class, affordable business solutions.

ERP Industry Software Solutions

- Custom and Make to Order Manufacturing
- Discrete Manufacturing
- Process Manufacturing
- Distribution
- Service Industry
- Dairy Industry

Choosing a CRM Solution

With Sage, you have the freedom to choose a CRM software solution that best fits your unique business requirements, you have flexibility in deployment methods (on-site or on-demand via the Web) and you have options to move easily between Sage CRM Solutions as your business evolves.

SageCRM.com: a comprehensive on-demand CRM solution for businesses seeking a low-cost, low-risk option with a fixed monthly price delivering: the CRM application, support, training, backups and updates.

SageCRM: an easy-to-use, fast-to-deploy on-site CRM software solution with out-of-the-box but configurable business process automation.
