

Technology Policy Implementation

What Are The Benefits?:

- Reduce business risk with a comprehensive discussion of technology and security policies
- Review business processes and risk areas to ensure documented policies reflect actual organization processes
- Gain insight from Chortek's consultants who work with many businesses in varied industries
- Implement accountability for all employees to protect company and customer data
- Policy documentation templates are provided in conjunction with a Wisconsin law firm to ensure Backup intervals every 15 minutes for the short term, month-ends on the long term

What You Will Get:

- Consultative review of your current organization's technology and security policies and procedures by an experienced Chortek consultant and the attorney who developed the templates
- Technology policy documentation including usage policy and acknowledgement document for all employees to sign
- Security policy documentation including security incident policies, procedures and documentation

Chortek's consultants have helped many organizations improve their cybersecurity preparedness. A foundational component of cybersecurity preparedness is documented technology and security policies and procedures. Chortek uses and implements a policy and procedure framework developed by a Wisconsin based law firm, with industry specific regulatory awareness of HIPAA, FINRA and PCI requirements.
